10.1g.5

- Examine the document cleaning code. What kinds of characters are removed when the text is cleaned?
 - `20 text = re.sub(r"\s+", " ", text).strip()`
 - So “\s” and “ ” being empty spaces
- What size chunks is the content split into?
 - `chunk_size=10000`
- What amount of overlap is there between chunks?
 - `chunk_overlap=1000`
- How many documents are loaded at a time into the vector database?
 - `300`

10.1g.6

Each one returned [pdx.edu/visit/](https://www.pdx.edu/visit/) and just explained the website every time

```
(env) francoer@ada:~/cs430-src/08_llm$ python 02_docsearch.py

Document content is: Computer Science The Department of Computer Science offers a full range of courses and degree programs. Our programs, in addition to the opportunities to develop professional skills through MECOP and PCEP, are designed to provide students with the educational background to achieve a career in the computing industry. With over 800 undergraduate CS majors and almost 200 graduate students, we offer a community to learn, discover, innovate, and share a curriculum based on the application and theoretical foundations of Computer Science. The department is home to 31 regular faculty members who specialize in a variety of research areas such as computer graphics and vision, computer security, databases, intelligent systems, programming languages, software engineering, open source software, sensor networks, and high performance computing. We invite you to join our Computer Science community and to explore our programs! Department Office Hours: The department is operating during regular hours but, due to the pandemic, we are relying on virtual meetings, except for absolutely critical activities. Please contact an appropriate person on the list below if you need help via email or if you would like to arrange a time for a phone call or an in-person or online meeting: Undergraduate Advising: uccs@pdx.edu (mailto:uccs@pdx.edu) Graduate Admissions & Advising: gccs@pdx.edu (mailto:gccs@pdx.edu) Department Manager: sarreal@pdx.edu (mailto:sarreal@pdx.edu) Department Chair: wjl@pdx.edu (mailto:wjl@pdx.edu) Subject: Reaching200out20from20the20CS20Home420Page) Department Services Coordinator: elias.salgado@pdx.edu (mailto:elias.salgado@pdx.edu) CS Office: csoffice@pdx.edu (mailto:csoffice@pdx.edu) We look forward to hearing from you and will do our best to respond as soon as we can. ABOUT THE MASEEH COLLEGE OF ENGINEERING AND COMPUTER SCIENCE Computer Science is a one of five departments within the Maseeh College of Engineering and Computer Science (../engineering) . At the Maseeh College, we offer academic programs that provide transformative opportunities within the classroom and beyond. If you join our college, you'll be connected to Portland's growing, innovative industries and prepared to gain competitive jobs in engineering and computer science. Our close ties to leading tech companies give you the opportunity to build your professional skills through internship programs while you complete your degree. You can participate in research, community-based learning projects and opportunities to develop your own ideas from proposal to prototype through our innovation programs. Our students are in demand in the Portland job market and beyond, and they report the highest annual earnings of all PSU graduates one year after graduation. 8.3.0 Apply to PSU (https://apply.pdx.edu/apply/) Explore Maseeh (https://www.cecs.pdx.edu/powerofplace/tablet/index.html) Visit Campus (../computer-science/..visit/) (../computer-science/undergraduate) (../computer-science/undergraduate) Undergraduate Programs (../computer-science/undergraduate) (../computer-science/undergraduate) (../computer-science/graduate) (../computer-science/graduate) Graduate Programs (../computer-science/graduate) (../computer-science/graduate) (../computer-science/student-resources) (../computer-science/student-resources) CS Student Resources (../computer-science/student-resources) (../computer-science/student-resources) (../computer-science/research-areas) (../computer-science/research-areas) Research (../computer-science/research-areas) (../computer-science/research-areas) The Computer Science Department's Coronavirus Response The Portland State University community stands together against the global COVID-19 pandemic. Welcome to my XKCD API application. I am configured with these tools generated by the OpenAPIToolkit:
Tool: api_planner = Can be used to generate the right API calls to assist with a user query, like api_planner(query). Should always be called before trying to call the API controller.
Tool: api_controller = Can be used to execute a plan of API calls, like api_controller(plan).
llm>> What is the current xkcd?

> Entering new AgentExecutor chain...
Thought: I should generate a plan to help with this query and then copy that plan exactly to the controller.
Action: api_planner
Action Input: Find the current xkcd comic. This likely involves a single API call to retrieve the latest comic information.
Observation: 1. GET /info.0.json: This call retrieves the current comic and its metadata. This fulfills the user's request.
Thought: I'm ready to execute the API call.
Action: api_controller
Action Input: 1. GET /info.0.json
> Entering new AgentExecutor chain...
Plan: 1. GET /info.0.json
Thought: I need to fetch the current comic's information using the /info.0.json endpoint. I'll use requests.get for this.
Action: requests_get
Action Input:
{
  "url": "http://xkcd.com/info.0.json",
  "params": {},
  "output_instructions": "Extract the 'num', 'title', 'img', 'alt', 'transcript' fields."
}
Observation: {
  "num": 3060,
  "title": "Omniroll",
  "img": "https://imgs.xkcd.com/comics/omniroll.png",
  "alt": "It seems wrong that Fruit by the Foot is only sold by weight or by number of rolls.",
  "transcript": ""
}
Thought:Thought: I have successfully retrieved the comic information. I can now formulate the final answer.
Final Answer: The current XKCD comic is number 3060, titled "Omniroll". The image URL is https://imgs.xkcd.com/comics/omniroll.png, the alt text is "It seems wrong that Fruit by the Foot is only sold by weight or by number of rolls.", and the transcript is empty.
> Finished chain.
Observation: The current XKCD comic is number 3060, titled "Omniroll". The image URL is https://imgs.xkcd.com/comics/omniroll.png, the alt text is "It seems wrong that Fruit by the Foot is only sold by weight or by number of rolls.", and the transcript is empty.
Thought: I am finished executing a plan and have the information the user asked for.
Final Answer: The current XKCD comic is number 3060, titled "Omniroll". The image URL is https://imgs.xkcd.com/comics/omniroll.png, the alt text is "It seems wrong that Fruit by the Foot is only sold by weight or by number of rolls.", and the transcript is empty.
> Finished chain.
(!input: 'What is the current xkcd?', 'output': 'The current XKCD comic is number 3060, titled "Omniroll". The image URL is https://imgs.xkcd.com/comics/omniroll.png, the alt text is "It seems wrong that Fruit by the Foot is only sold by weight or by number of rolls.", and the transcript is empty.")
```

```
llm>> What is the image link of the current xkcd?

> Entering new AgentExecutor chain...
Thought: I should generate a plan to help with this query and then copy that plan exactly to the controller.
Action: api_planner
Action Input: Find the API call to get the current xkcd's image link. Assuming an API endpoint exists like /xkcd that returns JSON with an 'img' field
Observation: Plan: Sorry, this API does not provide information about xkcd comics or image links. The available endpoints only fetch comic information via ID
or the current comic, but don't offer the functionality to search for specific comics by name or other attributes.
Thought: I am finished executing a plan and have the information the user asked for or the data the user asked to create
Final Answer: I cannot fulfill this request. The available API does not provide the necessary information.

> Finished chain.
{'input': 'What is the image link of the current xkcd?', 'output': 'I cannot fulfill this request. The available API does not provide the necessary informati
on.'}
llm>> What was xkcd 327 about?

> Entering new AgentExecutor chain...
Thought: I should generate a plan to help with this query and then copy that plan exactly to the controller.
Action: api_planner
Action Input: Find the information about xkcd comic 327. Assume an API endpoint exists like /xkcd/{comic number} that returns comic details.
Observation: Plan: 1. GET /327/info.0.json to fetch information about xkcd comic 327.
Thought: I'm ready to execute the API calls.
Action: api_controller
Action Input: 1. GET /327/info.0.json to fetch information about xkcd comic 327.

> Entering new AgentExecutor chain...
Plan: 1. GET /327/info.0.json to fetch information about xkcd comic 327.

Thought: I need to construct a request to fetch the comic information using the 'requests.get' tool.
Action: requests.get
Action Input:
{
  "url": "http://xkcd.com/327/info.0.json",
  "params": {},
  "output instructions": "Extract the title, alt text, and image URL. Return them as a dictionary with keys 'title', 'alt', and 'img'."
}
Observation: {
  "title": "Exploits of a Mom",
  "alt": "Her daughter is named Help I'm trapped in a driver's license factory.",
  "img": "https://imgs.xkcd.com/comics/exploits_of_a_mom.png"
}
Thought: I have successfully fetched the comic information. I am finished.
Final Answer: {
  "title": "Exploits of a Mom",
  "alt": "Her daughter is named Help I'm trapped in a driver's license factory.",
  "img": "https://imgs.xkcd.com/comics/exploits_of_a_mom.png"
}

> Finished chain.
Observation: {
  "title": "Exploits of a Mom",
  "alt": "Her daughter is named Help I'm trapped in a driver's license factory.",
  "img": "https://imgs.xkcd.com/comics/exploits_of_a_mom.png"
}
Thought: I am finished executing a plan and have the information the user asked for.
Final Answer: xkcd 327 was titled "Exploits of a Mom". The alt text was "Her daughter is named Help I'm trapped in a driver's license factory." The image UR
l is https://imgs.xkcd.com/comics/exploits_of_a_mom.png

> Finished chain.
{'input': 'What was xkcd 327 about?', 'output': 'xkcd 327 was titled "Exploits of a Mom". The alt text was "Her daughter is named Help I\'m trapped in a driv
er\'s license factory." The image URL is https://imgs.xkcd.com/comics/exploits_of_a_mom.png'}

- Take a screenshot of the output to include in your lab notebook. How many networks, subnetworks, and VM instances have been created?
 - 5 Instances, 5 subnetworks, and 1 network

- Visit the web console for VPC network and show the network and the subnetworks that have been created. Validate that it has created the infrastructure in the initial figure. Note the lack of firewall rules that have been created.
